

ADD A NEW DIMENSION

with Gage 78 Earth Metal™ Dimensional Surfacing

Earth Metal™ is a highly dimensional and extremely durable architectural surfacing designed for use as feature walls, columns, elevator interiors, ceilings and other innovative architectural applications. Earth Metal products are made from 66% recycled aluminum, and come in a wide variety of designs and finishes which are suitable for both interior and exterior use. This brand new, state-of-the-art product is truly unlike anything you've ever seen before.
