

Custom Designed Acoustical Solutions

Beautiful Solutions for Noisy Conditions...

Koroseal Interior Products offers a wide array of acoustical products specifically designed to manage sound in virtually any interior space. If the goal is to effectively control high noise levels associated with public areas such as today's open office environments, contemporary dining spaces, and challenging educational facilities, **Koroseal Sound Designs Acoustical Treatments** combine both elegance and functionality.

Discover:

- Customized Solutions
- Exceptional Sound Absorption
- Superior Craftsmanship
- Distinctive Surface Materials
- Versatile Constructions
- Low Maintenance Options
- Easy Installation

Wall Panels, Baffles and Clouds

Engineered to provide customized solutions, **Koroseal Acoustical Treatments** are expertly manufactured with only the highest quality materials. Panel shapes, sizes, surface selections, edge details and mounting systems are carefully evaluated and custom-designed to provide a finished product that delivers superior acoustical performance for any facility.

Our products are available in a variety of thicknesses specifically manufactured to provide the level of sound absorption your environment requires. NRC ratings range from 0.75 to 1.10 depending upon the surface materials and mounting options selected and wall panel, baffle or cloud thickness.

Options to Satisfy Any Design Criteria...

Every interior presents a special challenge and design opportunity. Functional acoustical wall panels can be turned into pieces of art. High traffic areas with noise issues can be treated with impact resistant acoustical treatments. Decorative acoustical clouds can make a visual impact while improving speech intelligibility.

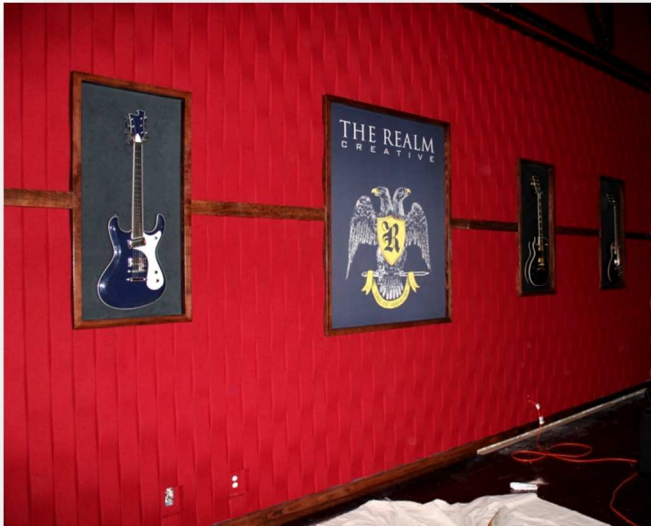

Product Options:

- **Performance Series** – versatile, affordable and most frequently specified construction for Wall Panels, Baffles and Clouds
- **Performance Plus Series** – tackable, medium impact Wall Panels
- **EQoustics™ Series** – low emitting acoustical treatments with recycled content
- **Impact Performance Series** – when impact resistance and design are important – fabric wrapped impact Wall Panels
- **High Impact Performance Series** – impact resistant surface with superior acoustical absorption
- **Texture Performance Series** – exceptional sound absorption products with acoustically textured and painted surfaces.
- **Dual Performance Series** – a versatile sound barrier with sound absorbing qualities and a tackable surface
- **Suspended Acoustical Ceiling Clouds** – reduces reflected sound in large open areas
- **Hanging Acoustical Baffles** – absorbs reverberating sound in large open areas
- **Performance Art Series** – printed wall panels, baffles and clouds and dimensional wall panels enhance any environment.

Custom Designed Acoustical Solutions

When Beauty and Function Conspire...

Sound Designs Performance Art™ Series

Koroseal Sound Designs is changing the face of acoustical treatments in a beautiful and functional way. Our collection of digitally printed and dye sublimation printed treatments and our newest introduction – **Performance Art™ Series 3-D** offers an inspiring way to transform a space in both design and performance.

These innovative acoustical treatments can be manufactured for use in any space where reverberation sound is an issue. Imagine transforming performance and conference areas, ballrooms and focus walls – anywhere sound is an issue and visual impact is desired.

Each beautiful design is crafted from recycled content, semi-rigid fiberglass. Your choice of acoustically correct fabric is bonded to the surface of the panel, providing a finished product that is as stunning as it is sound absorptive.

All designs can be scaled for a full wall application or for use as a piece of “acoustical art”. The graphic designs or dimensional elements can meet most design criteria for space and orientation. Patterns can be custom crafted to help you express your artistic vision.
