

Koroseal Interior Products introduces a new generation of performance textile wallcoverings to our Inspirations collection of high performance wallcoverings.

Crypton brings unmatched fabric performance to upholstery and furniture with superior water & soil repellency and cleanability.

Today, that performance is available in a collection of vertical surface fabrics

REPREVE[®]
recycled yarns by unifi

Each of these patterns is woven utilizing Repreve[®] recycled polyester yarn by Unifi[®], which is produced from certified, recycled, plastic soda and water bottles. As a result, each new pattern has 100% recycled content, with a minimum 15 % post-consumer.

Commitment to the Environment

- **Produced from recycled polyester, with a minimum 15% post-consumer content.**
- **Completely recyclable when the time comes to redecorate**
- **No PVC, volatile organic compounds, heavy metals, formaldehyde, or ozone depleting substances.**

So feel confident specifying Crypton wall surfaces, knowing that your selection provides the very best in PERFORMANCE, SUSTAINABILITY and BEAUTY.

Inspirations High Performance Textiles Transitions to Polyester Content...

For a quarter century, Hytex has been an industry leader in the supply of high performance fabrics to the commercial wallcovering and panel markets.

New breakthroughs in pigment technology now provide color-fastness for yarn-dyed polyester that rival their solution-dyed predecessors. With that in mind, all INSPIRATIONS patterns are now produced with combined olefin/polyester content or 100% polyester.

All technical and performance data meet or exceed original ratings.
