

ARBOR[®] WOOD

WALLCOVERINGS

Naturally Beautiful. Expertly Crafted.

ARBOR WOOD WALLCOVERINGS

If you can dream it, we can help you create it. With Koroseal Arbor Wood Wallcoverings, you can incorporate the warmth and beauty of real, all-natural wood into any design space. We offer a comprehensive line of high-quality wood solutions that are not only naturally beautiful, but also easily adapt to meet the needs of your creative vision.

Created from the highest AA architectural-grade wood veneer, Arbor Wood delivers the irreplaceable look and feel of real wood in a versatile wallcovering that can conveniently be applied to walls, ceilings, columns, or corners. Arbor's patented slicing technique, paired with our digital design and color customization options, results in an incredibly flexible, authentic wood option that we know you will love to create with.

Let our expert Koroseal Sales Representatives help you select the perfect Arbor Wood Wallcovering for your design vision.

WALNUT, AMERICAN FLAT CUT

At Koroseal, we provide advanced design solutions that allow you to create with confidence. Our offerings not only elevate a room through beautiful design, but also provide superior functionality – durable enough for everyday use, yet flexible enough to apply to almost any project scenario. Arbor Wood Wallcoverings are quality crafted products that can seamlessly and strikingly transform your space.

ARBOR WOOD LAYERED DIAGRAM

5-Ply Construction plus a Protective Finish

NATURAL BEAUTY OF REAL WOOD

Arbor Wood Wallcoverings are created from real, natural wood – no imitations. Plus, all products benefit from our industry-leading manufacturing and superior craftsmanship.

FLEXIBLE FIT

With its 5-ply construction, Koroseal Arbor offers the flexibility of a contract wallcovering, allowing you the ability to easily transform walls, ceilings, corners, or even non-traditional curved or contoured surfaces.

ENDLESS DESIGN OPTIONS

Choose from over 100 combinations of wood species, colors, and cuts to create your dream design. Further customizations are available through our custom staining and finish matching capabilities, specialty finishing effects for added durability and resistance, digital printing options, translucent sheets, inlays, and acoustic panels.

COST EFFECTIVE

Our real wood wallcoverings are applied directly to drywall, offering significant cost savings compared to alternative millwork installations.

ENVIRONMENTALLY CONSCIOUS

Arbor's patented slicing technique increases the yield of each log by 300%, optimizing the amount of veneer extracted. We prioritize sustainability with low emitting, responsibly sourced veneers - including our FSC® Certified Mix Recons - crafted from controlled materials and rapidly renewable species.

HUMAN CONSCIOUS

Arbor is a Class A Fire Rated, low-emission real wood veneer, providing peace of mind for building occupants.

EASY INSTALLATION

Specified in Division 9, and installed like contract wallcoverings. Each piece is sequentially numbered and matched, prefinished, and ready to install upon arrival.

100% COMMITMENT TO CUSTOMER SUPPORT

We offer full-service, national support from start to finish. Call your dedicated Koroseal Sales team whenever you need us. Plus, all products are backed by a 1 year product warranty.

Consciously CRAFTED

At Koroseal, we are dedicated to providing solutions that not only create beautiful spaces, but preserve forests, support biodiversity, and minimize both human and environmental impact. By leveraging industry-leading innovations, we are able to help conserve natural resources and preserve the future of tomorrow.

Arbor Wood Wallcovering is a premium real-wood veneer, crafted with sustainability at its core, making it an eco-friendly choice – without compromising on quality.

- ✓ **Purposefully Manufactured** – With Arbor's patented slicing technique, we are able to achieve approximately 300% greater yield from each log. The volume that would typically require three trees, can now be produced with just one.
- ✓ **Responsibly Sourced, FSC®-certified** – FSC-Certified forests are managed to strict environmental, social and economic standards. Arbor provides an extensive selection of options, including our FSC Certified mix Recons – crafted from controlled materials and rapidly renewable species. FSC-certified products help you meet your project's sustainability objectives and can contribute to achieving LEED credits.
- ✓ **MAS Certified Green Certificate of Compliance, NAUF** – Arbor products do not contain any added urea formaldehyde, and comply with CDPH VI.2 low emissions testing, contributing to LEED credits.

SOLUTIONS for Every Space

NATURAL BEAUTY

Every design project is unique. Arbor Wood Wallcoverings empower designers with masterfully crafted options that offer detailed beauty within every grain. Whether you are looking to add a sense of warmth to a room, customize an intricate wood pattern across an accent wall, or carry the natural beauty of wood around a curve or corner, we can help you achieve your masterpiece. Arbor Wood Wallcoverings allow you to design freely, and execute precisely.

INGRAINED in the Details

Face Types

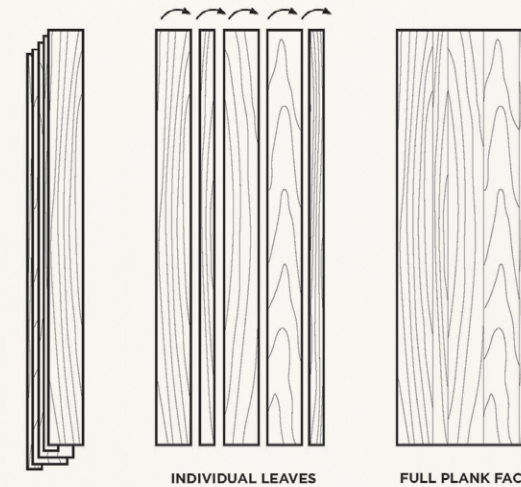

The Face Type or Face Name is the way the flitches, or leaves, are laid on the face (sheet) of the panel to produce the desired appearance.

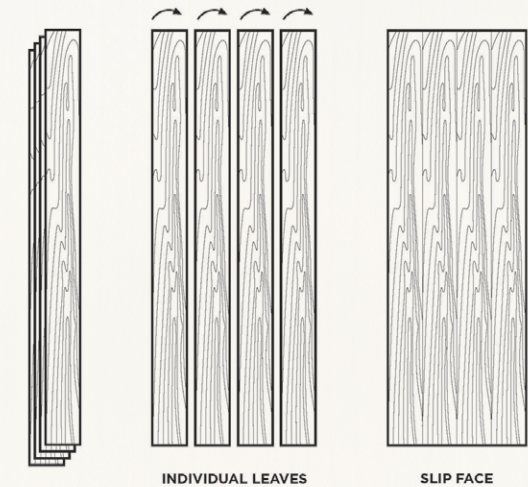

BOOK MATCH: The most commonly used veneer match in the industry. Every other piece of veneer is turned over (flipped), like two facing pages in a book. The veneer joints match and create a mirrored image pattern at the joint line, yielding a maximum continuity of grain. Book Matching is used with flat, quarter, rift, or rotary cuts.

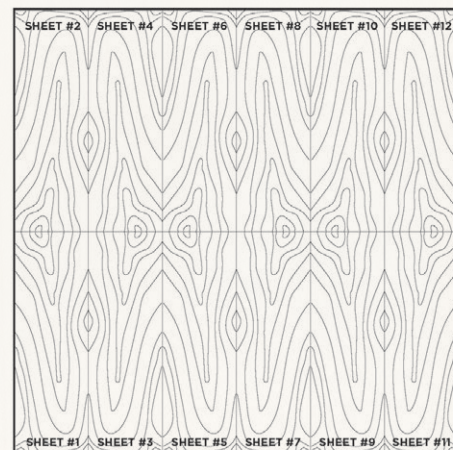

BLOCK PLANKING: Leaves with varying lengths from different logs of the same species are arranged in deliberate mismatched manner to achieve a natural lumber effect, with end joints on the face.

RANDOM MATCH FULL LENGTH PLANK: Random Matching is just what it sounds like. Leaves are placed next to each other in a random order and orientation, producing a board-by-board effect. This can be specified as Flat Cut and Quarter Cut or just one cut can be utilized in the production of this face match and it can be specified as all one width or random width.

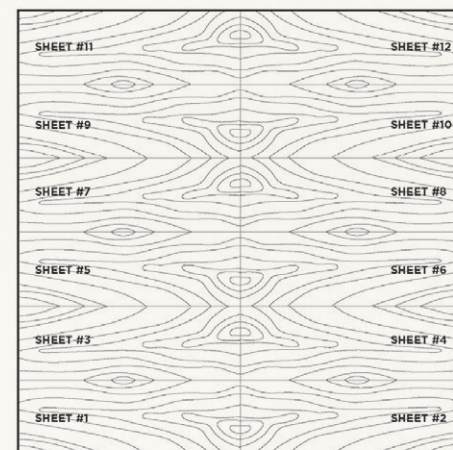

SLIP MATCH: Often used with Quarter Cut and Rift Cut veneers. This is the process in which a sequence of matching veneer leaves are slipped out (not flipped over) one after the next. It is easier to achieve a uniform color with Slip Matching because all the leaves have the same light refraction.

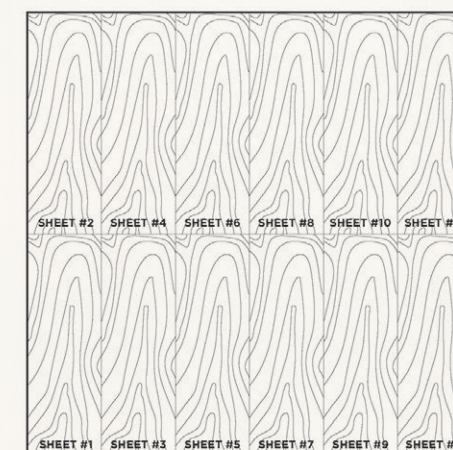

END MATCH: End Match is used to extend the apparent length of available veneer for high wall and ceiling installations. Sheets are produced Book Match as per the drawing. The top sheets are flipped to match the grain (not perfectly) from the previous sheet.

**When End Matching or stacking greater than two sheets in length, this should be clearly defined in the specification and on the order.*

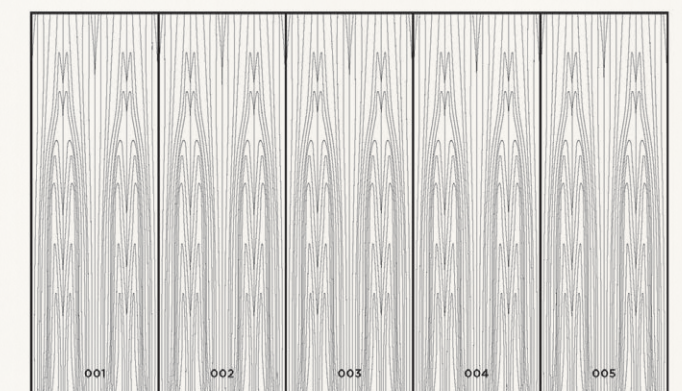

RAILROAD & END MATCH: The horizontal application of wallcovering is also known as railroading. Sheets are produced as Book Match, but Railroading sheets can create a different visual effect. The sheets can either be End Matched, Stack Matched, or offset to accomplish this. Railroading and End Matching are typically used in very large areas with long walls.

**When End Matching or stacking greater than two sheets in length, this should be clearly defined in the specification and on the order.*

STACK MATCHING: Sheets are stacked on top of each other (not reversed as we would do with End Matching). The leaf widths are the same in most cases. There is no expectation that the grain will match. We also call this a Pleasing Match. Most Recons are installed in this fashion.

**When End Matching or stacking greater than two sheets in length, this should be clearly defined in the specification and on the order.*

SEQUENCE MATCHING: The sheets have been produced in order from the same log. For ease of installation, the sheets are numbered on the bottom of the sheet and they are installed left to right in ascending order. The number of sheets per sequence can be limited by species, cut, grain-orientation, and yield.

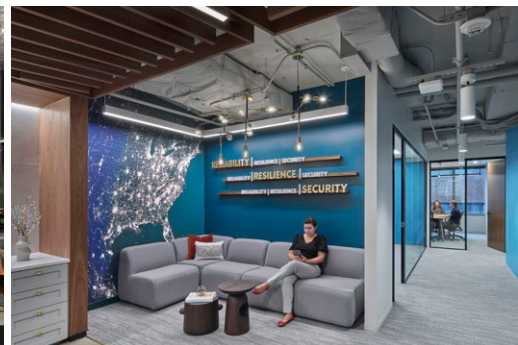

Ready. Set. CREATE!

At Koroseal, we love to create. Our Koroseal Sales team is dedicated to helping bring your design vision to life – from start to finish, and anytime in between.
