

REPEATED ROLLER MARKS

Korogard Protective Wallcovering is an extremely durable fire rated protective wall and door surfacing material for application in environmentally controlled building interiors. Korogard sheets and rolls are widely used in areas subject to high-traffic abuse where the exceptional impact, gouge, and scratch resistance of a Korogard surface minimizes damage and related maintenance costs. Excellent cleanability and chemical resistance provide maximum protection from stains and graffiti.

The attributes of Korogard Protective Wallcovering are a result of the specialized extrusion process utilized when manufacturing the sheets and rolls. Color is integral throughout the product. Texture and gloss are permanently embossed as the sheet is manufactured, not in a secondary process. This specialized extrusion process results in a repeating pattern across each panel. This pattern is present on all Korogard semi-rigid wallcovering. Repeating patterns are inherent in the product and will not be considered a material defect.
