

# ARCHITECTURAL PANEL SYSTEMS

Seamless Solutions. Endless Possibilities.

American  
Architectural  
Products  
Group

## ARCHITECTURAL PANEL SYSTEMS

If you can dream it, we can help you create it. Koroseal | AAPG Architectural Panel Systems are engineered for the built environment with modular designs, flexible fit, easy-to-clean panels, and enhanced acoustic performance that offer durability and versatility beyond a beautifully designed space.

Architectural panels add depth and sophistication to any space, regardless of the design style or influence, by utilizing AAPG's unique, proprietary fastening systems. Our panel systems are available in a wide variety of colors, finishes, substrates, and performance characteristics that can be used for wall and ceiling applications.

Let our expert Koroseal Sales Representatives help you select the perfect Architectural Panels for your design vision.

### **ENDLESS DESIGN OPTIONS**

Our modular panel systems offer unmatched versatility with a wide range of finishes, substrates, and applications—including digital solutions for fully customized looks. Engineered for adaptability, our products suit any project's needs. Our expert design and engineering teams provide fully integrated shop drawings, ensuring precision and seamless installation.

### **SUPERIOR CRAFTSMANSHIP**

State-of-the-art factories ensure precision, efficiency, and top-tier quality at every stage. Rigorous quality control processes, advanced systems, and expert oversight guarantee a flawless product with no surprises upon delivery.

### **INDUSTRY-LEADING EXPERTISE**

As trusted leaders in interior solutions, Koroseal and AAPG bring unmatched industry knowledge and technical expertise. We deliver fully integrated solutions tailored to architects' and designers' needs.

### **CLASS A FIRE RATED**

Fire rated, water-resistant, and impact-resistant phenolic panels.

### **SUSTAINABLE PRODUCT OPTIONS**

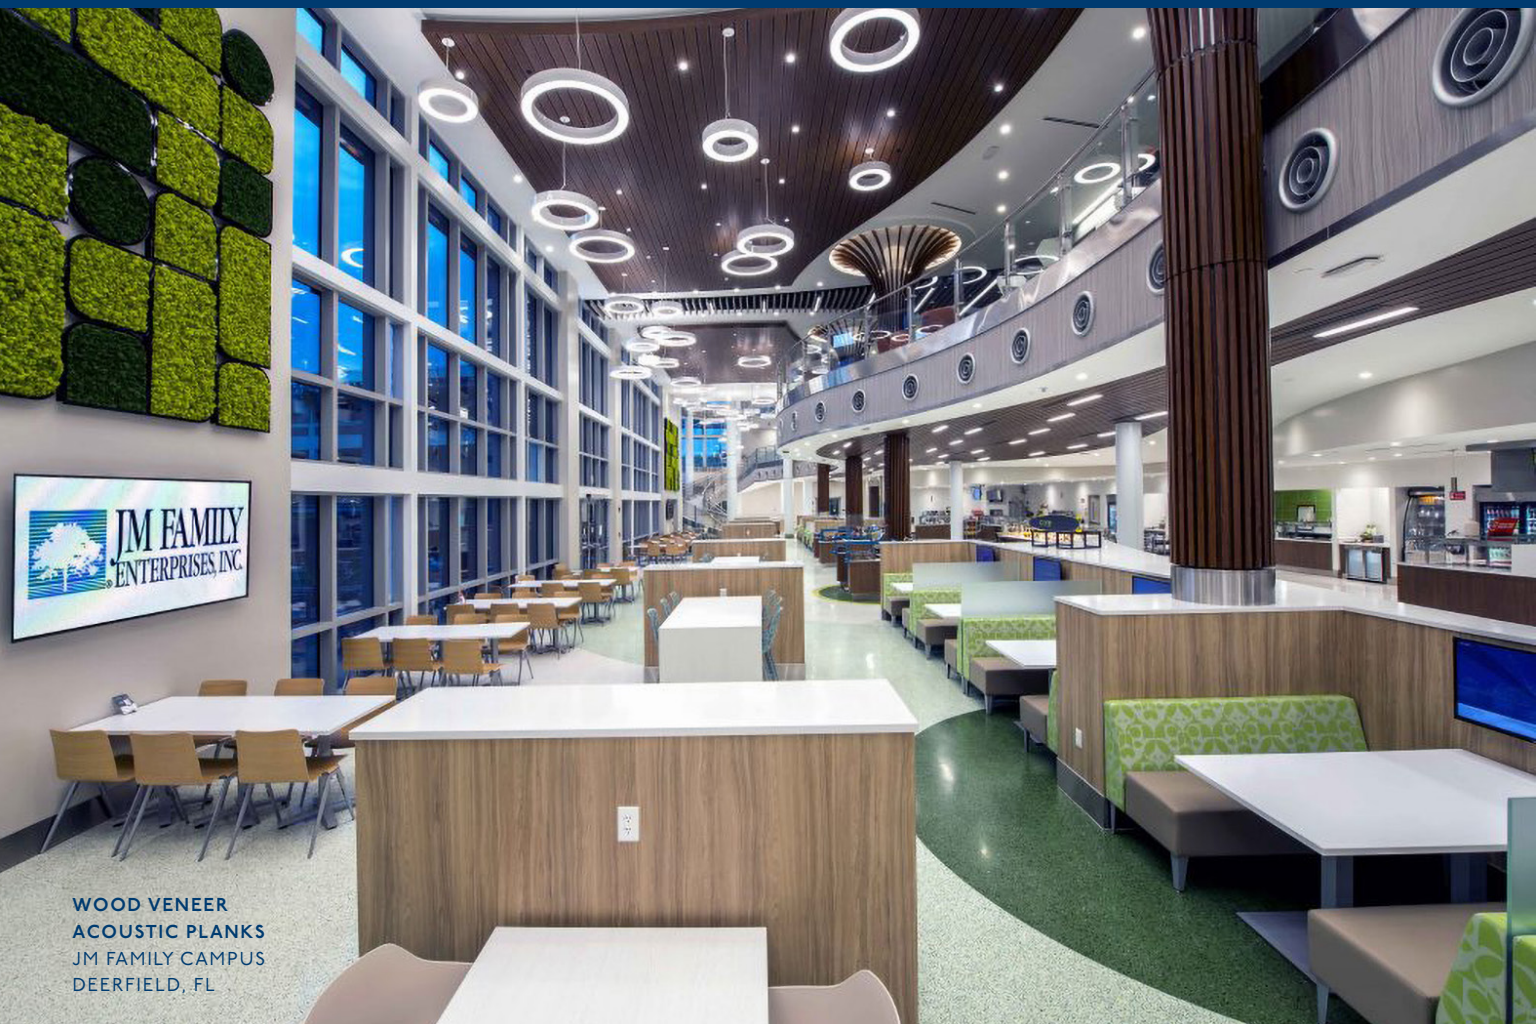

Our tailored approach enables us to create solutions to meet your sustainability needs. Contact us to select the solution that best aligns with project requirements.

### **100% COMMITMENT TO CUSTOMER SUPPORT**

We offer full-service national support from start to finish. Call your dedicated Sales Representative team whenever you need us. Plus, all products are backed by a 1-year product warranty.

# WALL PANEL SYSTEMS

Available in a wide array of finishes, installation methods, acoustic performance, and applications utilizing a variety of secure, flexible attachment methods, including Z-clips, aluminum splines, and concealed fasteners. Our knowledgeable customer service representatives will guide you through the selection process to create the system and components to meet your unique project needs.

# STRUCTURAL PANEL SYSTEM

## Strength, Precision, and Versatility

High-performance interior panel solution engineered for robust structural integrity and seamless installation. Featuring a non-progressive steel frame with concealed fasteners, this system supports heavy panels and high-traffic applications while maintaining a clean, architectural aesthetic.

### PERFORMANCE AND DURABILITY

- ♦ Rapid, Secure Installation: pre-machined panels with concealed fastening for precision alignment
- ♦ Heavy Panel Support: partial weight transfer to the floor allows for structurally sound installations
- ♦ Utility Integration: stand-off configurations allow for ductwork and electrical routing
- ♦ Fire Rated and Acoustical Options:
  - NRC-rated panels for sound absorption
  - Available in Class A fire rated and non-combustible substrates

### DESIGN FLEXIBILITY

- ♦ Mix and match material types, thicknesses, and shapes
- ♦ Multiple reveal and edge options for custom aesthetics
- ♦ Material types: wood veneer, HPL, phenolic, fabric, hemp, custom digital designs, and radius panels to accommodate curved walls

HPL ACOUSTICAL PANELS  
HOOVER DAM VISITOR CENTER  
BOULDER CITY, NV

THEATER

# MODULAR PANEL SYSTEM

## Precision, Performance, and Speed

Non-progressive framing solution designed for fast, precise installation with the ability to accommodate multiple material types, thicknesses, and shapes within a single elevation. Pre-machined panels and precision alignment allow for installation in half the time of traditional systems—delivering a flawless, customized finish.

**HPL PANELS**  
CROWNE PLAZA  
WARWICK, RI

**CUSTOM SHAPED HPL PANELS**  
CROWNE PLAZA  
WARWICK, RI

**HPL PANELS**  
ST. VINCENTS  
LITTLE ROCK, AR

## PERFORMANCE AND DURABILITY

- ♦ Fast and Accurate Installation: pre-machined panels ensure a perfect fit with minimal labor
- ♦ Structural Strength: non-progressive aluminum frame system for enhanced stability and individual panel removal
- ♦ High-Performance Features:
  - Acoustic panels with NRC ratings of 0.9 - 0.95
  - Fire rated and antimicrobial material options
  - Utility integration with projection to accommodate ductwork and wiring

## DESIGN FLEXIBILITY

- ♦ Mix and match material types, thicknesses, and shapes
- ♦ Multiple reveal and edge options for custom aesthetics
- ♦ Material types: wood veneer, HPL, phenolic, fabric, hemp, and custom digital designs

# LOW PROFILE PANEL SYSTEM

## Fast and Resilient

The industry's fastest-installing wall panel solution, requiring no fasteners or clips. Engineered for rapid deployment in high-traffic and high-performance environments, panels feature a sleek 3/8" projection, water-resistant phenolic construction, and superior chemical resistance.

PHENOLIC WALL PANELS  
NOVA UNIVERSITY  
TAMPA, FL

## PERFORMANCE AND DURABILITY

- ♦ Ultra-Fast Installation: panels slot into place without machining, clips, or fasteners
- ♦ Industry's Thinnest System: only 3/8" total projection for a minimalist, space-saving profile
- ♦ High-Performance Features:
  - Fire Rated, Water-Resistant, and Impact-Resistant Phenolic Panels
  - Antimicrobial and Chemical-Resistant for Clinical and Clean Environments

## DESIGN FLEXIBILITY

- ♦ Mix and match finishes for customization
- ♦ Multiple panel thicknesses and configurations available
- ♦ Phenolic panel standard, also available with HPL and custom design finishes
- ♦ Perfect for angled walls, soffits, and column enclosures

**HPL WALL PANELS**  
200 CENTRAL AVE  
ST. PETERSBURG, FL

# PLANK PANEL SYSTEM

## Effortless Installation, Exceptional Performance

Designed for speed, durability, and simplicity, offering a clip-free tongue and groove installation that maximizes material yield and eliminates unnecessary waste. Ideal for walls and ceilings, this system features high-impact HPL or wood veneer surfaces that ensure long-lasting durability in high-traffic environments.

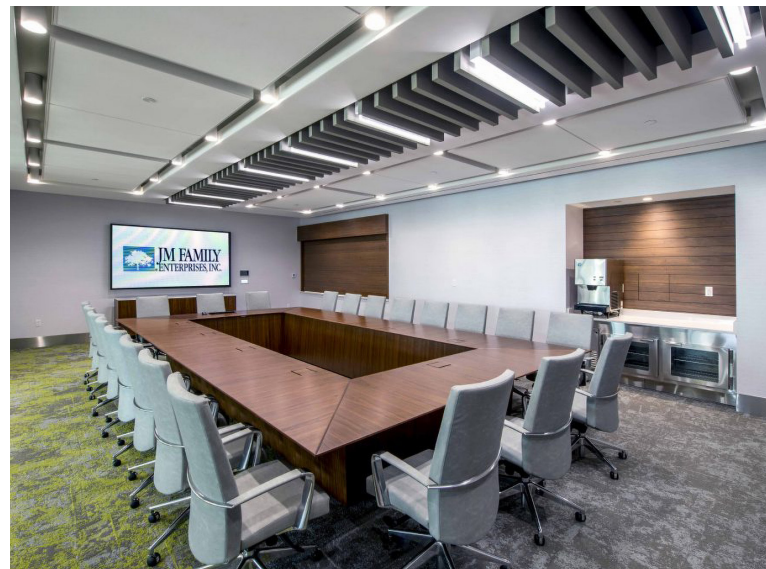

### WOOD VENEER PLANKS

JM FAMILY CAMPUS  
DEERFIELD, FL

### WOOD VENEER PLANKS

DUNEDIN CITY HALL  
DUNEDIN, FL

**WOOD VENEER PLANKS**  
RITZ CARLTON  
NEW YORK, NY

## PERFORMANCE AND DURABILITY

- ♦ Quick and Waste-Free Installation: no panel matching required—simply cut to length on-site
- ♦ Impact-Resistant and Fire Rated: available with Class A wood veneers and moisture-resistant substrates
- ♦ Acoustical Options:
  - Perforated or slotted panels with acoustic fleece backing
  - Custom digital designs available

## DESIGN FLEXIBILITY

- ♦ Material types: wood veneer, HPL, phenolic, and custom digital designs
- ♦ Wide array of finishes: faux woods, solids, and abstract patterns
- ♦ Seamless installation across angled walls, soffits, ceilings, and column enclosures

PETALUMA, CA

## CLOUD CEILING SYSTEM

### Floating Elegance with Acoustic Performance

Creates a striking floating design that enhances both the aesthetics and acoustics of any space. Available as complete, ready-to-hang units or as individual panels with pre-attached “star” hangers, this system provides a seamless, efficient installation process while allowing easy access to the plenum when needed.

#### PERFORMANCE AND DURABILITY

- ♦ Acoustic or reflective panel options for optimal sound control
- ♦ Fast and simple installation with concealed suspension clips
- ♦ Durable and lightweight construction for long-lasting performance
- ♦ Compatible with industry-standard lighting, HVAC, speaker, fire safety, and security systems

#### DESIGN FLEXIBILITY

- ♦ Available in wood veneer, HPL, and custom digital designs
- ♦ Customizable panel shapes and sizes to fit any ceiling layout
- ♦ Optional concealed return trim for a clean, modern aesthetic
- ♦ Perfect for both architectural statements and functional acoustic enhancements

# BAFFLE AND BEAM CEILING SYSTEM

## Stylish Sound Management

Combines modern aesthetics with superior acoustic performance. Designed for sound absorption and dispersion, these ceiling elements enhance spatial acoustics while adding a bold architectural statement.

### PERFORMANCE AND DURABILITY

- ♦ Acoustic or reflective baffle options to control sound absorption and dispersion
- ♦ Durable, lightweight materials designed for long-term performance
- ♦ Sized from 2" to 12" high and 1" to 3" thick, with lengths up to 12', depending on material selection
- ♦ Fast and simple installation with multiple suspension options
- ♦ Compatible with industry-standard lighting, HVAC, speaker, fire safety, and security systems

**HPL ACOUSTIC BAFFLES**  
BEARCATS STADIUM  
BINGHAMPTON, NY

**WOOD VENEER ACOUSTIC BAFFLES**  
 SETON REC CENTRE  
 CALGARY, CA

### DESIGN FLEXIBILITY

- ♦ Available in wood veneer, HPL, and fabric
- ♦ Customizable panel shapes and sizes to create unique design statements
- ♦ Optional concealed return trim for a clean, modern aesthetic

## PANEL AND PLANK CEILING SYSTEM

### Elegant, Acoustic, and Effortless to Install

Consists of acoustically perforated or solid reflective linear planks that easily click into a carrier suspension system for a quick and efficient installation. These panels bring both style and superior sound management to your space.

#### PERFORMANCE AND DURABILITY

- ♦ Acoustic or reflective panel options for enhanced sound control
- ♦ Lightweight MDF panels with impact-resistant wood veneer or HPL for durability
- ♦ Class A fire rated and moisture-resistant substrates available for demanding environments
- ♦ Fast and simple installation with pre-drilled panels and concealed stainless steel fasteners
- ♦ 2.75 lbs per square foot, making them easy to handle and install

WOOD VENEER  
ACOUSTIC PLANKS  
FT. LAUDERDALE  
YACHT CLUB, FL

**DESIGN FLEXIBILITY**

- ♦ Available in HPL, wood veneer, and custom digital designs
- ♦ Acoustical slotted and perforated options for customized sound control
- ♦ Standard panel sizes of 24" width and 48", 72", or 96" lengths
- ♦ Ideal for a range of applications with various aesthetic and functional needs

# DIGITAL SOLUTIONS

**Innovative, Customizable, and Acoustically Optimized**—Digital Solutions offer the ability to print virtually any graphic on a variety of surfaces. Our digital technology applies digital artwork seamlessly across multiple components, creating stunning, continuous digital elevations that enhance any space. Whether you're looking for vibrant visuals or acoustic performance, we provide custom solutions that meet your design and functional needs.

DIGITAL FABRIC  
ACOUSTIC WALL PANELS  
SLIGH MIDDLE SCHOOL  
TAMPA, FL

## PERFORMANCE AND DURABILITY

- ◆ Post-lamination process ensures prints are sealed for longevity and durability
- ◆ Anti-microbial lamination ideal for maintaining clean environments
- ◆ Acoustically transparent surfaces available for sound management
- ◆ Precision machining of panels for picture-perfect fit and easy installation

**STANDARD AND  
DIGITAL HPL PANELS**  
HOOVER DAM  
VISITOR CENTER  
BOULDER CITY, NV

**STANDARD AND DIGITAL  
WOOD VENEER PLANKS**  
CAMBRIA SUITES HOTEL  
MADEIRA BEACH, FL

## DESIGN FLEXIBILITY

- ◆ Prints across multiple surfaces including, wood veneer, HPL, phenolic, fabric, and hemp
- ◆ Custom graphics and designs available or use your images
- ◆ Multiple thicknesses and finishes can be used in the same elevation for a seamless look
- ◆ Acoustical options to complement the design
- ◆ Works seamlessly with wall panel systems

WOOD VENEER PANELS  
ROCHESTER INSTITUTE  
OF TECHNOLOGY  
ROCHESTER, NY

# MATERIAL TYPES

## HIGH PRESSURE LAMINATE (HPL)

Anti-microbial high-impact HPL available in a wide variety of patterns, colors, woods, and stones.

## REAL WOOD VENEER

Natural and recon veneer available in numerous species, stains, and dyes.

## PHENOLIC

Durable, Class A Fire Rated, self-supporting sheets resist high-impact, harsh chemicals, moisture, and humidity. Can be used in double-sided applications.

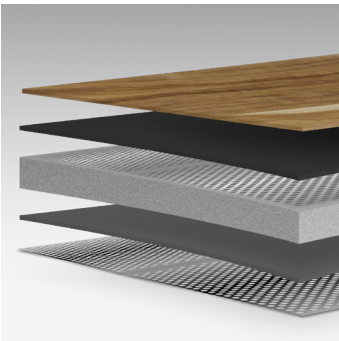

## FABRICS

Wide range of acoustic and non-acoustic fabrics.

## HEMP

Lightweight and durable, resistant to warping, and providing excellent insulation properties with a unique, textured finish.

## PERFORATED PANELS

Wood Veneer and HPL panels can be perforated or micro-perforated to provide aesthetically pleasing, high-performance acoustical panels.
